CERTIFICATE OF TESTING

DATE: September 1, 2013

The MegaDeck HD mats have been tested with ASTM D790, or similar, testing parameters on a 3-point bending apparatus: 4 foot unsupported span of composite mat and does not deflect more than 4 inches under a load of 10,000 lbs at 73 degrees F across the center of a normally 94-inch wide mat. The MegaDeck HD exceeded the stiffness of the requirements mentioned above.

Supervisor Approval:

A handwritten signature in blue ink that reads "Bart Berghuis".

Bart Berghuis, Director of Corporate Technology
